

IASL AI toolkit for teachers

By Lesley Farmer

Snapshot

Dr Lesley Farmer, Chair of the IASL Information Literacy Special Interest Group shares two new toolkits for teacher librarians and teachers on Artificial Intelligence (AI). The group invites contributions.

[IASL's Information Literacy Special Interest Group](#) is excited to announce their new project: an AI toolkit for teacher librarians and a similar AI toolkit for classroom teachers.

One [IASL toolkit](#) is an ongoing collection of free resources for teacher librarians to use as part of their library program and to inform their own professional growth. The [other toolkit](#) is very similar, and teacher librarians can offer this toolkit to their teachers to use as part of their classroom practice and to inform their own professional growth. Most resources are comprehensive or collections rather than single lesson plans, for instance.

If you have suggestions for toolkit resources, please contact Lesley.Farmer@csulb.edu

Dr. Lesley Farmer, Professor at California State University (CSU) Long Beach, coordinates the Teacher Librarianship program, and was named as the university's Outstanding Professor. She also manages the CSU ICT Literacy Project. Dr Farmer is also the Chair of the IASL Information Literacy Special Interest Group.
